Special Features

- UL969-recognized, high-performance label materials
- Economical label run quantities
- Durable, vivid color images
- Label serialization

Heavy-duty labels for harsh environments.

Weber's new line of durable film label materials are specifically designed to maximize long term performance of labels on products that need heavy-duty labels that last.

A durable label is intended to remain with a durable good throughout the product's life and must withstand possible hostile environments such as exposures to chemicals, extreme temperatures, or UV light. Additionally, the label often must be recognized by UL as being a component itself of the durable good.

Durable products, such as tools, automotive parts, warning signs, consumer electronics, industrial machinery and more need labels that will withstand repeated use, abuse and harsh weather.

What goes into a Weber Durable Digital label?

- Robust base material of polyester, vinyl or polypropylene
- All-temp, aggressive acrylic adhesive
- Pigmented printing inks
- Ultra-tough Digilam PET overlaminates

Durable Color Labels

Labels

General Specifications

Digiweb White VINYL

Description

UL-recognized vinyl film designed for durable label applications.

Applications

- Graphic display point-of-purchase decals
- Shelf-bin warehouse labels
- Excellent conformability to curved surfaces

Facesheet

3.4-mil vinyl: 3.4 mils/.0034"

Adhesive

High-performance permanent solvent acrylic

Liner

3.2 mils/.0032" bleached, super-calendered paper

Ink

Pigmented, fade-resistant HP ElectroInk technology

Protective Overlaminates (required)

1.0 mil/.0010" clear gloss polyester overlaminates

Recognition

- Weber UL File Number: MH12204
- RoHS/Regulation 2002/95/EU compliant
- UL Recognized for both indoor and outdoor use

Digiplate White, Silver, Chrome & Clear PET

Description

UL-recognized polyester films designed for durable label applications.

Applications

- Instruction labels/Warning decals
- Medical device identification labeling
- Toy decoration/Sporting equipment labels

Facesheet

2-mil polyester: 2.0 mils/.0020"

Adhesive

High-performance permanent solvent acrylic

Liner

3.2 mils/.0032" bleached, super-calendered paper

Ink

Pigmented, fade-resistant HP ElectroInk technology

Protective Overlaminates (required)

1.0 mil/.0010" clear gloss polyester overlaminates

Recognition

- Weber UL File Number: MH12204
- RoHS/Regulation 2002/95/EU compliant
- UL Recognized for both indoor and outdoor use

Digiflex White BOPP

Description

UL-recognized polypropylene film designed for durable label applications.

Applications

- Instruction labels/Warning decals
- Medical device identification labeling
- Toy decoration/Sporting equipment labels

Facesheet

2.3-mil vinyl: 2.3 mils/.0023"

Adhesive

High-performance permanent emulsion acrylic

Liner

3.2 mils/.0032" bleached, super-calendered paper

Ink

Pigmented, fade-resistant HP ElectroInk technology

Protective Overlaminates (required)

1.0 mil/.0010" clear gloss polyester overlaminates

Recognition

- Weber UL File Number: MH12204
- RoHS/Regulation 2002/95/EU compliant
- UL Recognized for both indoor and outdoor use
