

ONE WEBER ONE PARTNER

We Identify Your World

90+ YEARS OF INNOVATION

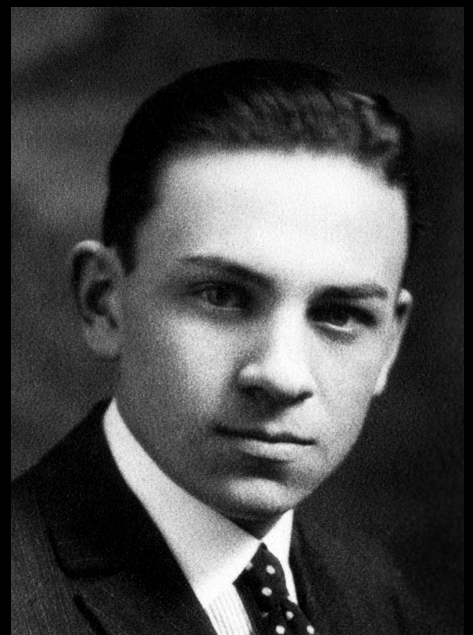

OUR STORY

Founded in 1932 in Chicago, IL, by Joseph Weber Sr., Weber introduced the Tag-O-Graph hand printer for directly marking cartons. What began as a simple marking solution evolved into advanced pressure-sensitive labels, print-and-apply systems, RFID, and coding technologies.

Today, as part of the Weber Global Group, we operate as a global provider of labeling and marking solutions, serving manufacturers across North America and international markets from our headquarters in Arlington Heights.

Our longevity isn't just measured in years — it's reflected in the people who serve our customers every day.

Joseph Weber, Sr.

WEBER
GLOBAL GROUP

DRIVEN BY EXPERIENCE

+ COMPLETE SOLUTIONS

Labels, applicators, printers, coding systems, RFID, and software—all from one trusted source.

+ EXPERIENCED PEOPLE

Many Weber team members have decades of tenure, providing consistency, deep knowledge, and longterm relationships.

+ EXPERT GUIDANCE

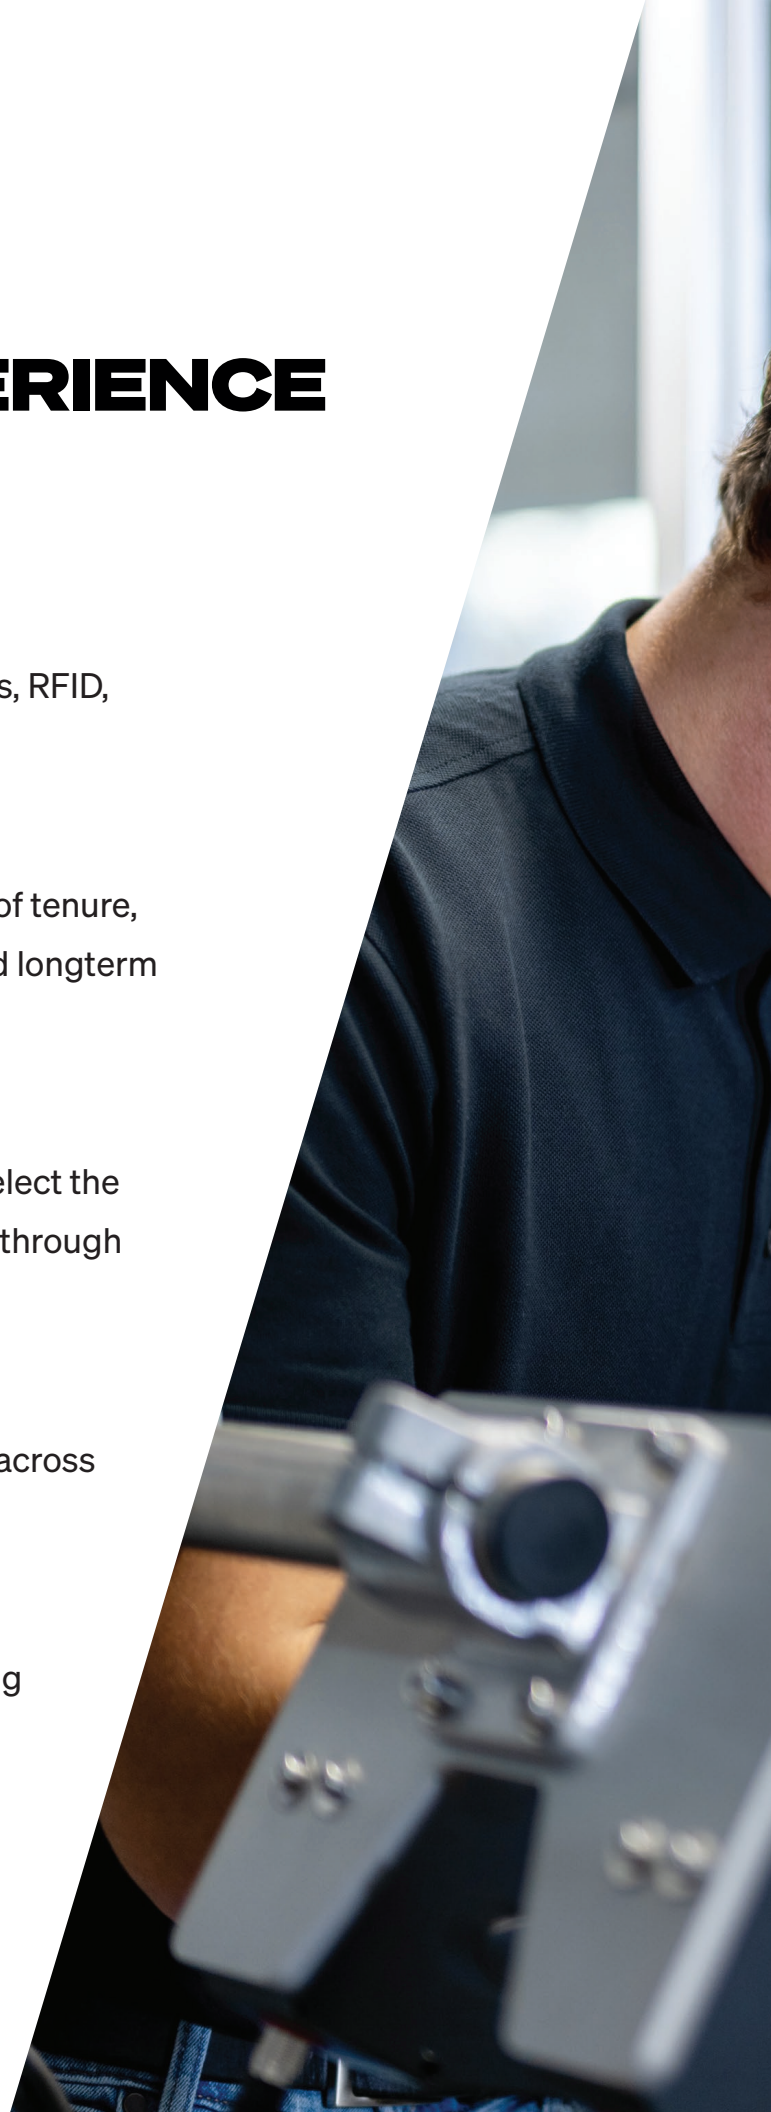

Application-driven expertise ensures you select the right solution the first time. We support you through installation, training, and beyond.

+ NATIONWIDE SUPPORT

Direct sales, service, and technical support across North America.

+ GLOBAL STRENGTH

Backed by Weber's worldwide manufacturing capabilities and innovation network.

5-Star Google Reviews

“We’ve worked with Weber for nearly 25 years. Every department handles business professionally and with genuine care. The technicians are extremely knowledgeable. Five stars.”

— Bruce Khabbazi, Canadian
Distribution Channel

“The team truly understood our requirements—even as they changed—and delivered exactly what we discussed. Fantastic labels and great cooperation.”

— Scott McGregor, Crown Group

“Extremely knowledgeable partner from concept to solution to installation. Highly recommended.”

— Derrick McDowell, FCM

A LEGACY OF TRUST

For over 90 years, Weber has combined the strength and resources of a global organization with the responsiveness and personalized service of a trusted local partner.

COMPLETE IDENTIFICATION SOLUTIONS

**ENGINEERED TO PERFORM.
DESIGNED TO INTEGRATE.**

For over 90 years, Weber has delivered integrated identification systems that power supply chains, manufacturing lines, and global distribution networks.

From the label itself to the software that manages it, we provide complete solutions designed to work together seamlessly. Weber has over 35 flexo and digital presses that can handle label production runs from 500 to 5 million.

Whether your application requires high-speed automation, durable labeling for harsh environments, RFID tracking, or enterprise-wide label management, Weber delivers systems built for performance, accuracy, and reliability.

MOVING INNOVATION FORWARD

SHAPING THE FUTURE OF MARKING, LABELING, & CODING

- + Increased adoption of RFID and smart labeling
- + Integrated automation for modern production lines
- + Expanded coding feeder solutions for reliable product handling and seamless inkjet integration
- + Digital connectivity and software-driven labeling systems
- + Label design & management software
- + Continued investment in global manufacturing and support

Weber is investing in advanced technologies to help customers improve visibility, efficiency, and traceability across their operations. Innovation at Weber is about listening to our customers, understanding real world production challenges, and engineering solutions that perform reliably day after day.

With global resources, experienced teams, and a continued commitment to long-term partnerships, Weber is positioned to support the next generation of manufacturing, packaging, and distribution.
