This adjustable jig fixture helps ease the transition from manual to semi-automatic labeling using a Weber tamp-blow, pressure-sensitive label applicator or printer-applicator.

The jig fixture is designed exclusively for easy attachment to Weber's heavy-duty t-base stand, which provides a secure mount for both the fixture and a Weber labeling system. The jig fixture's sturdy table and adjustable X and Y axis fences and recessed scales provide a workstation that facilitates operator involvement.

Quick-release knobs and levers enable the operator to adjust the guide fences to accommodate products or packages from 5” to 20.5” wide. Label application is activated through the use of a footswitch or convergent proximity sensor.

The jig fixture’s t-base mount, table and adjustable fences are constructed of durable, lightweight aluminum. The unit’s working surface consists of over 440 square inches.

**KEY FEATURES**
- Works with all Weber tamp-blow label applicators and printer-applicators
- Easy to adjust and use
- Built from rugged, lightweight aluminum
Adjustable Jig Fixture

For Tamp-Blow Labeling Systems

Table Width
23.875" (606.4mm)

Table Depth
18.5" (469.9mm)

Table Height
Adjustable from 34.75" to 38" (882.6mm to 965.2mm)

Construction
Durable, lightweight aluminum

Options
Footswitch or proximity switch operation
